

Turn your note pad into a tablet with e-pens create. Write, draw and edit photos on your screen with the digital pen and ordinary paper!

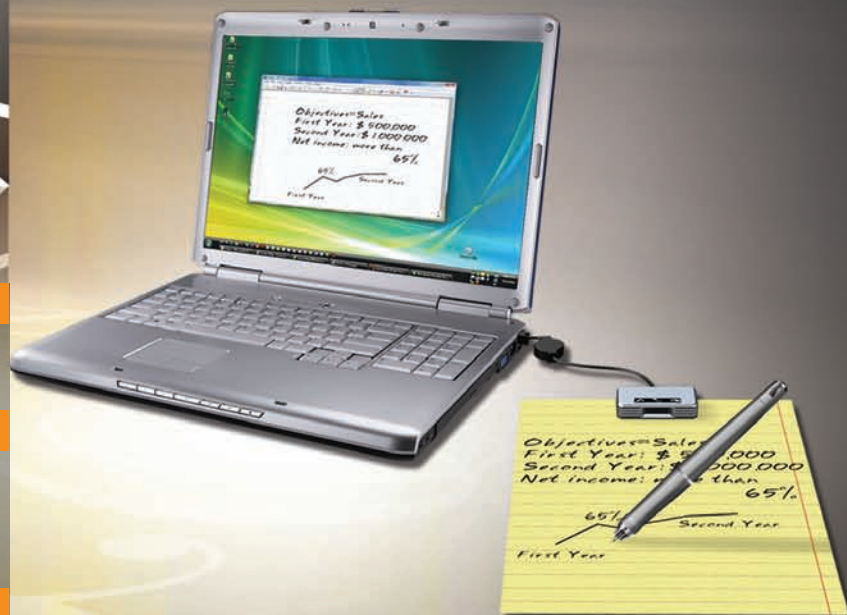

## Unleash the creative potential of your PC with the amazing e-pens create.

The digital pen gives new and exciting creative opportunities for all PC users with the ability to draw, paint, edit and write into your PC. The digital pen uses ink or stylus refills for use with normal paper or any surface. It's so easy to use, with plug and play installation; it's perfect for home or office use.

Drawing or editing using a normal mouse can be frustrating, the e-pens create digital pen removes this frustration and allows you to draw and edit your photos, images and creations easily and accurately.

e-pens create also has mouse and stylus functionality with Windows XP® and Vista®, allowing you to take full advantage of extra features, such as the inking and tablet PC features included with MS Vista® and MS Office 2007®.

### Draw & Paint

Drawing & Painting into your PC is easy with e-pens create. Bring your ideas to life and draw and share sketches, illustrations and doodles with friends and colleagues.

### Personalise

Add your own distinctive touches to anything you do from photos to handwritten notes, drawing and sketches. Photo Editing and Retouching bring out the best in your photographs. Create your own photo scrapbook, turn photographs into paintings, and add captions, colours and clarity.

### Handwriting

e-pens create unlocks the handwriting features of Microsoft Vista. The digital pen and base unit captures your handwritten notes in real time onto your PC or notebook. You can save them and back them up onto your PC, allowing you to recycle your paper. You can also handwrite directly into applications like MSN Messenger™, Windows Journal™ & MS Office™ applications.

### Navigation

Nothing is as natural as a pen; e-pens create helps you find your way through your documents and files.

### create functionality
